## WG-303 TOUCH

### WOLFGUARD WG-303 TOUCH

Advanced Technology in Precision and Durability

#### Key Features

Specially developed for demanding work environments, WG-303 TOUCH combines touchscreen compatibility, high grip performance, and comfort—offering professional users a reliable, long-lasting solution.

#### Technological Highlights

- Nitrile Coating Technology

Provides greater durability and lifespan than polyurethane. Delivers maximum performance even in the toughest tasks.

- Anti-Slip Grip Performance

Ensures superior traction on oily and slippery surfaces, helping minimize workplace accidents.

- Touchscreen Compatibility

Enables uninterrupted interaction with digital devices—no need to remove gloves.

- Ergonomic Design

Reduces fatigue with a form-fitting structure for comfortable, extended wear.

#### User Benefits

- Safe and controlled working environment
- Abrasion-resistant, long-lasting construction
- Design aligned with modern work processes
- Full control in precision-demanding tasks

#### Application Areas

- Industrial Operations: Efficiency in assembly, technical maintenance, and production workflows
- Automotive Sector: Ideal for detailed assembly and precision-based tasks
- Slippery Surfaces: Enhanced safety and stability in oily environments
