WG-76603

WOLFGUARD WG-76603

Timeless Performance & Durability

Product Features

- Nitrile Coating Technology

Provides high grip performance on both oily and dry surfaces, ensuring reliable use in demanding tasks.

- Thin Coating Design

Offers a bare-hand feel during work, enhancing comfort and efficiency throughout the day.

- Dot-Patterned Palm Structure

Improves grip on oily surfaces and delays wear, extending glove lifespan.

- Cotton-like Texture

Dermatologically approved, skin-friendly structure ensures comfortable long-term use.

- DMF & Silicone-Free Composition

Free from harmful substances—safe for users and environmentally friendly.

Certification

- EN 388: 4.X.3.2 A – Complies with durability and safety standards

Advantages

- Superior grip for safe handling on all types of surfaces
- Abrasion-resistant design for long-lasting performance
- Cotton-like texture suitable for sensitive skin
- Materials that prioritize both user health and environmental safety

Application Areas

- Oily Surface Work: Enhanced grip and safety performance
- Precision Tasks & Assembly: Ideal for high-sensitivity operations thanks to its thin design

- Dry Environments: Perfect for maximum control and comfort

WOLFGUARD WG-76603 is an essential solution for professionals, combining innovative coating technology with a durable design. It's the perfect choice for those seeking efficiency and safety in their work processes.
