

ALZ-4540

WOLFGUARD ALZ-4540

Fire Suit Offering Short-Term Protection Against Extreme Heat

Designed for high-risk environments, the ALZ-4540 provides effective short-duration protection against radiant heat. Its aluminized aramid fabric and open-back design ensure both thermal defense and ergonomic comfort—making it ideal for professionals working near furnaces and casting operations.

Product Features

- Aluminized Aramid Fabric

Outer layer reflects heat; inner aramid layer enhances thermal resistance

- Extreme Temperature Resistance

Protects against temperatures ranging from 500°C to 1000°C

- Short-Duration Use Design

Optimized for brief exposure in high-risk heat environments

- Frontal Heat Shielding

Designed to protect against heat from the front only

- Open-Back Structure

Enhances breathability and mobility, reducing heat stress during extended wear

- CE-Certified Safety

Complies with European standards for industrial protective clothing

Key Advantages

- Effective protection against radiant heat and high temperatures
- Flexible design allows freedom of movement
- Reduces thermal stress for safer working conditions

Application Areas

- Iron, steel, and aluminum production facilities
- Workstations near furnaces and casting pots
- Heavy industry operations requiring short-term heat protection

WOLFGUARD ALZ-4540 delivers targeted thermal defense and ergonomic comfort—trusted by professionals who need reliable protection in intense heat zones.
