

## ALZ-4550

### WOLFGUARD ALZ-4550

#### Fire Suit Offering Superior Protection Against Extreme Heat

Designed for short-term use in high-risk environments, the ALZ-4550 combines aluminized shielding with ergonomic comfort. Certified to European safety standards, it provides reliable protection against radiant heat and supports safe movement in heavy industrial settings.

#### Product Features

- Aluminized Aramid Fabric

Outer layer reflects heat; inner aramid layer enhances thermal resistance

- Extreme Temperature Protection

Safeguards against temperatures ranging from 500°C to 1000°C

- Short-Duration Use Design

Ideal for brief exposure in high-temperature environments

- Ergonomic Structure

Flexible design allows freedom of movement and comfortable wear

- CE-Certified Safety

Complies with European standards for professional-grade protection

#### Key Advantages

- Effective defense against radiant heat and extreme temperatures
- Flexible design supports mobility and long-term comfort
- Reliable protection for heavy industry and high-heat operations

#### Application Areas

- Iron, steel, and aluminum production facilities
- Workstations near furnaces and casting pots
- Heavy industrial processes requiring short-term thermal protection

WOLFGUARD ALZ-4550 delivers dependable heat protection and ergonomic performance—trusted by professionals working in the most demanding thermal environments.
