

## ALZ-4580

### WOLFGUARD ALZ-4580 Aluminized Leg Guard

#### High-Temperature Protection with Freedom of Movement

Developed for extreme industrial environments, the ALZ-4580 leg guard offers superior radiant heat protection and ergonomic flexibility. Its aluminized design shields workers from thermal stress while allowing unrestricted mobility—making it an ideal solution for demanding metal production settings.

#### Product Features

- Industrial-Grade Heat Protection

Designed to reduce heat stress in environments with intense radiant temperatures, such as iron, steel, and aluminum production

- Extreme Temperature Resistance

Provides effective protection against temperatures ranging from 500°C to 1000°C

- Freedom of Movement

Ergonomic design ensures comfort and flexibility during extended use

- CE-Certified Safety

Complies with European standards for professional-grade protective equipment

#### Key Advantages

- Reliable defense against radiant heat and high temperatures
- Flexible structure supports long-term comfort and mobility
- Creates safe working conditions in heavy industrial environments

#### Application Areas

- Industrial settings with furnaces and casting pots
- Iron, steel, and aluminum production facilities
- Heavy industry operations involving high heat exposure

WOLFGUARD ALZ-4580 merges thermal protection with ergonomic design—trusted by professionals who require both safety and freedom in high-temperature environments.
