WOLFGUARD EP-40

Maximum Protection and Comfort with Professional Welding Gloves

The WOLFGUARD EP-40 is engineered for industrial-grade welding and metalwork, offering superior protection and long-lasting comfort. Its Para-Aramid stitching, premium cowhide leather, and reinforced palm construction make it a trusted choice for professionals working in high-risk environments.

Product Features

- Para-Aramid Threading
Hidden-stitch technique enhances resistance to cuts and burns.
- Extended Cuff Length
Provides broad protection against molten metal splashes.
- Premium Cowhide Leather
1.2 mm – 1.4 mm thick, durable, odor-free, and high-quality.
- Reinforced Palm
Strengthened structure ensures longer glove life.
- Soft Inner Lining
Specially designed for lasting comfort during extended use.

Key Advantages

- Outstanding durability and protection in harsh working conditions
- Ergonomic and comfortable design for prolonged wear
- Ideal structure for professional welding operations

Application Areas

- Industrial and professional welding tasks
- Metalworking and heavy industry applications
- Work environments exposed to cuts and high temperatures

WOLFGUARD EP-40 delivers robust protection and ergonomic comfort, making it a reliable solution for professionals who demand performance and safety without compromise.
