

EP-4500

WOLFGUARD EP-4500

Superior Heat Protection for Heavy-Duty Welding

Designed to withstand extreme radiant heat and molten metal exposure, the EP-4500 offers maximum thermal defense and long-lasting durability. Its aluminized shield and universal fit make it a practical and reliable solution for professionals working in high-temperature environments.

Product Features

- **High-Radiant Heat & Molten Metal Protection**
Shields against intense radiant heat and metal splashes during heavy welding
- **Durable Construction**
Extends glove lifespan by protecting against excessive heat
- **Universal Compatibility**
Easily fits over any glove model for quick and secure application
- **Hidden Stitch Technology**
Reinforced with Para-Aramid threads for enhanced resistance to cuts and burns
- **Aluminized Protective Shield**
Reflective surface provides extra thermal insulation
- **Industrial-Grade Design**
Fully compatible with molten metal handling and all welding operations

Key Advantages

- **Maximum protection against heat and splatter**
- **Long-lasting durability for extended use**
- **Easy to wear and compatible with various glove types**

Application Areas

- **Heavy welding operations and high-temperature tasks**
- **Metal casting and molten metal processing**
- **Industrial production and heavy manufacturing environments**

WOLFGUARD EP-4500 combines safety, durability, and ease of use—delivering a trusted solution for professionals who face extreme heat conditions daily.
