## WG-101 TOUCH

Advanced Technology in Precision and Durability

### Key Features

- Nitrile Coating Technology

Offers greater durability and resistance to harsh working conditions compared to polyurethane coatings.

- Anti-Slip Performance

Ensures superior grip and safe handling on oily and slippery surfaces.

- Touchscreen Compatibility

Enables interaction with devices without removing the gloves.

- Ergonomic Design

Combines comfort and durability, providing ease of use even during extended wear.

### Advantages

- Long-lasting performance
- Maximum efficiency in demanding tasks
- Full control in precision work

### Application Areas

- Assembly and maintenance operations
- Automotive industry
- Work on oily and slippery surfaces
